

## Guide to Programming Environment

### Login:

- The contest will be conducted over the Internet. You are not allowed to access anything but the contest environment.
- It is a team contest.
- You have to login with the team login id and password that you receive.
- Login can be done even before the start time of the contest.

### Environment:

- Your submissions are judged on Cube cluster.
- Cube (Intel Pentium G860 3GHz) consists of modern and fast Intel Pentium G860 CPUs.
- On this cluster memory limit for submissions is 1536 MB.

### Compiler:

- Programs are to be written in **C**, **C++** or **Java** only.
- For C/C++ programs use GNU C/ GNU C++ (Command: gcc/g++ file.c) compilers.
- For C use gcc- 4.9.2 compiler, for C++ use gcc- 4.9.2 compiler.
- For Java programs, use javac8.
- Use the usual commands: javac for compilation and java for running the program.
